1. Introduction

This guide is your go-to reference for managing the SEO of aphroditesharvest.com.au. It is written in plain language so you can apply updates yourself, without needing a developer or SEO specialist for routine tasks.

Following this guide regularly will help Aphrodite's Harvest appear higher in Google search results, attract more visitors, and convert them into customers.

How to use this guide

Read Section 2 first to understand the key SEO terms.

Work through Sections 3-6 in order when setting up for the first time.

Use Section 7 (Monthly Checklist) on the first Monday of every month.

Refer to Section 8 (Templates) whenever you write new content.

2. Key SEO Terms Explained

You do not need to be a technical expert to do SEO. Here are the key terms you will come across:

Term	What it means	Why it matters
Keyword	A word or phrase someone types into Google to find something.	Using the right keywords means Google shows your page to the right people.
Meta title	The blue clickable headline shown in Google search results.	A good meta title improves your click-through rate from Google.
Meta description	The short paragraph below the meta title in search results.	It convinces people to click your link instead of a competitor's.
Alt text	A short description added to every image on your website.	Helps Google understand your images and improves accessibility.
Backlink	A link from another website pointing to yours.	Google sees backlinks as a vote of trust, which improves your ranking.
Google Search Console	A free Google tool showing how your site performs in search.	Tells you which keywords bring visitors and flags technical issues.
Google My Business (GMB)	Your free Google business listing shown in Maps and local search.	Drives local customers to your website and physical location.
Page speed	How quickly your website loads for a visitor.	Slow sites rank lower in Google and lose visitors.

Schema markup	Hidden code that tells Google what type of content is on a page.	Can earn you rich results (stars, prices) in Google search.
Internal link	A link from one page on your site to another page on your site.	Helps Google crawl your site and keeps visitors engaged longer.

3. Your Target Keywords

These are the search terms most likely to bring the right customers to Aphrodite's Harvest. Use them naturally in your page titles, descriptions, headings, and blog posts.

3.1 Primary Keywords (use on your main pages)

Keyword	Monthly searches (AU)	Where to use it
raw honey South Australia	~500	Homepage title, homepage intro paragraph, product pages
organic honey Australia	~1,000	Product page titles and descriptions
local apiary products	~200	Homepage, About page, product descriptions
ethical beekeeping South Australia	~150	About page, blog posts
buy honey online Australia	~800	Products page title and meta description

3.2 Secondary Keywords (use in blog posts and supporting pages)

Keyword	Monthly searches (AU)	Where to use it
learn beekeeping online	~400	LearnAboutBees page, blog posts
Varroa mite prevention Australia	~300	Blog post: biosecurity
bee-friendly gardening	~250	Blog post: gardening series
native bee preservation	~200	About page, blog posts
beekeeping course online Australia	~350	LearnAboutBees SEO title
honey benefits and uses	~600	Blog post: educational content

Keyword tip

Do not stuff keywords into every sentence - write naturally for your reader first.

Aim to use your primary keyword once in the page title, once in the first paragraph, and 2-3 times throughout the page.
Variations count: 'South Australian honey', 'SA raw honey', and 'honey from South Australia' all help.

4. Page-by-Page Optimisation Guide

Each page on your website serves a different purpose. Use this section whenever you edit or update a page.

4.1 Homepage (aphroditesharvest.com.au)

Meta title

Recommended meta title

Raw Honey South Australia | Ethical Apiary Products | Aphrodite's Harvest

Meta description

Recommended meta description

Aphrodite's Harvest is a South Australian apiary offering pure raw honey, beeswax products, and beekeeping education. Shop local, ethical honey online.

Content checklist for the homepage

- Use the phrase 'raw honey South Australia' in your opening paragraph.
- Include a clear headline (H1) - only one H1 per page.
- Add links to your Products, Learn About Bees, and About pages.
- Include at least one customer testimonial or trust signal.
- Ensure all product images have descriptive alt text (see Section 5).

4.2 Products Page

Meta title

Recommended meta title

Shop Local Honey & Apiary Products | Aphrodite's Harvest SA

Meta description

Recommended meta description

Browse our range of raw honey, beeswax, and propolis from our South Australian apiary. Ethically produced, natural apiary products delivered Australia-wide.

For each individual product, include:

1. Product name with keyword variation (e.g., 'Raw Wildflower Honey - South Australian Apiary').
2. A description of at least 80 words using natural keyword language.
3. Weight, ingredients, and usage information.
4. A high-quality image with descriptive alt text.
5. Price and a clear 'Add to cart' or 'Buy now' button.

4.3 About Page

Meta title

Recommended meta title

About Us | Ethical Beekeeping in South Australia | Aphrodite's Harvest

Meta description

Recommended meta description

Learn about Aphrodite's Harvest - a family-run South Australian apiary committed to ethical beekeeping, biodiversity, and natural honey production.

Content to include:

- Your story and values (why ethical beekeeping matters to you).
- Your location in South Australia.
- Your beekeeping practices and sustainability approach.
- A photo of you or your hives with descriptive alt text.
- A link to LearnAboutBees and your Products page.

4.4 LearnAboutBees Page

Meta title

Recommended meta title

Learn Beekeeping Online | Beekeeping Courses Australia | Aphrodite's Harvest

Meta description

Recommended meta description

Discover beekeeping online with Aphrodite's Harvest. Learn about hive management, Varroa mite prevention, native bees, and sustainable apiculture in Australia.

Content to include:

- An overview of what visitors will learn.
- Links to individual educational articles or course modules.
- Cross-links back to product pages where relevant.
- Keywords: 'learn beekeeping online', 'beekeeping course Australia', 'native bee preservation'.

4.5 Blog Posts

Blog posts build your authority in Google's eyes and attract visitors searching for information. Aim for 2 posts per month.

Blog post structure (use every time)

6. Title: include your target keyword naturally (e.g., 'How to Prevent Varroa Mite in Your Australian Hive').
7. Introduction (1 paragraph): introduce the topic and mention the keyword.
8. Subheadings (H2 and H3): break content into clear sections of 100 - 200 words each.
9. Body: write 600-800 words minimum. Use keywords naturally 3-5 times.
10. Conclusion: summarise and include a call to action (e.g., 'Shop our honey' or 'Read more on LearnAboutBees').
11. Internal links: link to at least 2 other pages on your site.
12. Image: include at least one image with descriptive alt text.

Suggested blog topics (content calendar)

Month	Topic	Target keyword
May	What makes honey raw? A guide to unprocessed honey	raw honey South Australia
May	Varroa mite in Australia: what beekeepers need to know	Varroa mite prevention Australia
June	5 plants that support bees in your South Australian garden	Bee-friendly gardening
June	How we harvest honey ethically at Aphrodite's Harvest	ethical beekeeping South Australia
July	Beginner's guide to starting a beehive in Australia	learn beekeeping online
July	The difference between native and European honey bees	native bee preservation
August	How to read a honey label: what to look for	organic honey Australia
August	Why biodiversity matters to our apiary	ethical beekeeping South Australia

5. Images and Alt Text

Alt text is a short description added to every image on your website. It helps Google understand your images and is essential for accessibility (screen readers use it for visually impaired visitors).

5.1 How to write good alt text

The formula

[What it shows] + [context or keyword if relevant] + [brand if appropriate]

Example: 'Glass jar of raw wildflower honey from Aphrodite's Harvest South Australian apiary'
NOT: 'honey.jpg' or 'image1' or 'product photo'

5.2 Alt text examples for your site

Image	Good alt text
Jar of honey on wooden board	Raw SA wildflower honey in a glass jar on a wooden board - Aphrodite's Harvest
Beekeeper inspecting a frame	Beekeeper inspecting a honey frame at Aphrodite's Harvest South Australian apiary
Honeycomb close-up	Close-up of golden honeycomb from Aphrodite's Harvest ethical apiary
Beeswax candles	Hand-rolled beeswax candles made from Aphrodite's Harvest apiary wax
Map of apiary location	Map showing Aphrodite's Harvest apiary location in South Australia
Bee on lavender flower	Honey bee collecting nectar from lavender - Aphrodite's Harvest South Australia

5.3 Image file size rules

- Always compress images before uploading. Target: under 200 KB per image.
- Use WebP format where possible (better quality, smaller file).
- Use descriptive file names: 'raw-honey-south-australia.webp' not 'IMG_0034.jpg'.

6. Google Tools Guide

6.1 Google Search Console

Google Search Console (GSC) is free. It shows you which searches bring people to your site, which pages rank, and any technical problems Google has found.

How to check your performance (do this monthly)

13. Go to search.google.com/search-console and sign in.
14. Click 'Performance' in the left menu.
15. Set the date range to the last 3 months.
16. Look at 'Queries' - these are the search terms people used to find you.
17. Note any queries with high impressions but low clicks - these pages need better meta titles/descriptions.
18. Click 'Coverage' to check for any pages with errors (red) - fix these promptly.

What to look for

Impressions growing month-on-month = your SEO is working.
Clicks below 2% of impressions = your meta title/description needs improving.
Pages with 'Error' status in Coverage = contact your developer to fix.

6.2 Google My Business (GMB)

Your Google My Business listing is what appears when someone searches for 'Aphrodite's Harvest' or 'honey near me' in Google Maps and local search.

Monthly GMB tasks

19. Log in at business.google.com.
20. Add a new photo (a product, your hives, or a seasonal image).
21. Write a short post (1-2 sentences) about what's new - link it to a product or blog page on your website.
22. Reply to any new reviews within 48 hours. Thank positive reviewers by name. Address concerns politely.
23. Check that your opening hours and contact details are still correct.

How to write a GMB post

GMB post template

Line 1: Hook - something seasonal or timely. (e.g., 'Our autumn harvest is now available.')

Line 2: One sentence about the product or offer.

Line 3: Call to action with a link. (e.g., 'Shop online at aphroditesharvest.com.au/products')

Keep posts under 100 words. Post at least twice a month.

7. Monthly SEO Maintenance Checklist

Use this checklist on the first Monday of every month. It takes approximately 60-90 minutes.

7.1 Technical checks

✓	Task	Frequency
☐	Visit your website on a mobile phone and check all pages load correctly.	Monthly
☐	Test your site speed at pagespeed.web.dev — aim for a score above 70.	Monthly
☐	Check Google Search Console for any Coverage errors and resolve them.	Monthly
☐	Click every link in your main navigation to confirm none are broken.	Monthly
☐	Check that your sitemap is still submitted in Google Search Console.	Quarterly

7.2 Content updates

✓	Task	Frequency
☐	Publish at least 2 blog posts targeting secondary keywords.	Monthly
☐	Review the homepage intro paragraph - is it still relevant and seasonal?	Monthly
☐	Check all product descriptions are at least 80 words and include keywords.	Monthly
☐	Add alt text to any images uploaded in the past month.	Monthly
☐	Add at least one internal link in each new blog post to another page.	Each post

7.3 Off-page and local SEO

✓	Task	Frequency
☐	Post twice to Google My Business with a link to a product or blog page.	Monthly
☐	Reply to all new Google reviews.	Weekly
☐	Update your GMB listing if hours, services, or contact details change.	As needed
☐	Share each new blog post to Instagram and Facebook with a link to the full post URL.	Each post
☐	Send one outreach email to a partner (beekeeping assoc., local directory, eco-blog) requesting a backlink.	Monthly

7.4 Performance review

✓	Task	Frequency
---	------	-----------

☐	Log into Google Search Console and note your total clicks and impressions.	Monthly
☐	Note your top 3 performing pages by clicks - consider updating them to improve further.	Monthly
☐	Note your top 3 queries (search terms) - are you targeting them well?	Monthly
☐	Record your metrics in the tracking table below for trend monitoring.	Monthly

7.5 Monthly performance tracker

Month	Total clicks	Total impressions	Avg. position	Top page	Notes
May 2026					
June 2026					
July 2026					
August 2026					
September 2026					
October 2026					

8. SEO Templates

Copy and adapt these templates whenever you add or update a page. Replace the placeholder text in [brackets].

8.1 Meta title templates

Rules: 50-60 characters maximum. Include your primary keyword near the front. End with your brand name.

Page	Template	Example
Homepage	[Primary keyword] [Product type] Aphrodite's Harvest	Raw Honey South Australia Ethical Apiary Products Aphrodite's Harvest
Product page	[Product name] [Keyword variation] Aphrodite's Harvest	Raw Wildflower Honey SA Apiary Products Aphrodite's Harvest
Blog post	[Post title with keyword] Aphrodite's Harvest	Varroa Mite Prevention in Australia Aphrodite's Harvest
LearnAboutBees	[Topic] Courses Learn Beekeeping Online Aphrodite's Harvest	Beekeeping Courses Learn Beekeeping Online Aphrodite's Harvest

About page	About [Brand] [Keyword] [Location]	About Aphrodite's Harvest Ethical Beekeeping South Australia
------------	--	--

8.2 Meta description templates

Rules: 140-160 characters maximum. Include primary keyword, a benefit, and a call to action.

Page	Template
Homepage	[Brand] is a South Australian apiary offering [products]. Shop local, ethical honey online. [1 sentence about what makes you unique].
Product page	[Product name] from Aphrodite's Harvest SA apiary. [Key benefit or feature]. [Delivery or purchase detail]. Order online today.
Blog post	[1 sentence summarising the post]. Learn about [keyword] with Aphrodite's Harvest - South Australia's ethical beekeeping experts.
LearnAboutBees	Learn beekeeping online with Aphrodite's Harvest. [1 sentence about what students learn]. Practical, expert-led education from SA.
About page	Meet the team behind Aphrodite's Harvest - a family-run SA apiary committed to [values]. [1 sentence about your story or mission].

8.3 Blog post checklist template

Photocopy or print this and use it each time you write a new blog post.

Before you publish — blog post checklist

- ☐ Title includes target keyword naturally
- ☐ Meta title written (50-60 characters, keyword near the front)
- ☐ Meta description written (140-160 characters, includes keyword and a call to action)
- ☐ Opening paragraph mentions the keyword within the first 100 words
- ☐ Post is at least 600 words
- ☐ H2 subheadings used to break up sections (at least 2)
- ☐ At least 2 internal links to other pages on your site
- ☐ At least 1 image with descriptive alt text
- ☐ Image is compressed under 200 KB
- ☐ Call to action in the final paragraph (e.g., link to shop or LearnAboutBees)
- ☐ Post shared to Instagram and Facebook with full URL (not just homepage)

9. Building Backlinks

Backlinks are links from other websites pointing to yours. They are one of the most important ranking signals for Google. As a local, ethical brand you have excellent opportunities to earn quality backlinks.

9.1 Priority backlink targets

Organisation / Platform	How to get the link	Priority
SA Beekeepers Association	Contact them to be listed as a member producer on their website.	High
Local food and agri directories	Submit your business to LocalFoodSA.com.au and similar directories.	High
Environmental / conservation blogs	Offer to write a guest post about ethical beekeeping or native bee preservation.	Medium
Adelaide food and produce media	Send a press release about your products or educational platform.	Medium
Beekeeping forums and communities	Participate genuinely and link to relevant blog posts when helpful.	Low
Honeybee Conservation groups	Partner for awareness campaigns and request a listing on their site.	Medium

9.2 Outreach email template

Template — backlink request

Subject: Partnership opportunity — Aphrodite's Harvest

Hi [Name],

I'm [Your name] from Aphrodite's Harvest, a South Australian ethical apiary focused on raw honey and beekeeping education.

I came across [their website/organisation] and thought there might be a great fit for us to support each other. I'd love to be listed/featured on your [page/resource/directory] as we share a commitment to [shared value].

In return, I'm happy to [link to your site from our blog / feature your organisation / write a guest post].

Our website: aphroditesharvest.com.au

Would love to connect - feel free to reply or call me on [phone].

Warm regards,
[Your name]
Aphrodite's Harvest

10. Quick Reference Card

Keep this page handy as a summary of the most important actions.

Task	How often	Time needed
Publish a blog post	Twice a month	2-3 hours
Post to Google My Business	Twice a month	10 minutes
Reply to Google reviews	Weekly	5 minutes
Add alt text to new images	Every upload	2 minutes per image
Check Search Console performance	Monthly	15 minutes
Run full monthly SEO checklist	Monthly	60-90 minutes
Test site speed at pagespeed.web.dev	Monthly	5 minutes
Outreach to one potential backlink partner	Monthly	20 minutes
Review and update meta titles/descriptions	Quarterly	1-2 hours
Full SEO review and strategy update	Every 3 months	2-3 hours

Need help?

If you get stuck on any technical step, refer back to the relevant section of this guide.

For issues beyond routine maintenance (site errors, significant ranking drops, technical changes), contact your SEO consultant.

Track your progress monthly using Section 7.5 so you can see your site improving over time.
