

Aphrodhite's Harvest Digital Transformation

Aphrodite's Harvest — Client Handover Pack

EVERYTHING YOU NEED TO MANAGE YOUR SOCIAL MEDIA
INDEPENDENTLY — FROM DAY 1

Prepared by

Tashpia Hossain (S1-13)

Client:

Aphrodite Noikou — Aphrodite's Harvest

Welcome Aphrodhite

This pack has been created by Group S1-13 as part of the Adelaide University Digital Transformation Capstone Project. It contains everything you need to manage your social media presence independently — without needing external technical support.

Each section contains one deliverable. Start with the templates, use the example content as your first posts, follow the monthly checklist, and check your analytics guide once a month.

You do not need to do everything at once. Start with the quick wins and build from there.

What is in this pack

- 1 Post templates**
6 reusable Canva templates — one per content type
- 2 Example content pack**
7 ready-to-use posts across Instagram, Facebook, LinkedIn
- 3 Monthly checklist**
Weekly, monthly, and quarterly review tasks
- 4 Analytics starter guide**
What to track, when, and what it means

Before vs After

Structural Fixes Applied: Seven immediate improvements were identified and implemented — each demonstrable with a screenshot. These are recommended structural fixes identified through our audit, ready to implement in Week 1

Before May - 2025

Instagram

- X 2 posts — account appears abandoned
- X 37 followers — no Adelaide visibility
- X No reels, no stories, no highlights
- X Bio missing Adelaide and BSSA keywords
- X Single link — courses page only

Facebook

- X Category: "Health/Beauty" — completely wrong
- X About section empty — no keywords
- X No CTA button configured
- X Mostly sharing other organisations' content
- X No Facebook Events created for any course

LinkedIn

- X Personal profile only — no business page
- X 1 connection, zero posts
- X BSSA credentials not mentioned anywhere
- X Learn About Bees has no social presence

STRATEGY APPLIED

After Strategy Applied

Instagram

- ✓ 3-pillar content strategy — consistent posting schedule
- ✓ Reels, carousels, stories, and highlights all created
- ✓ Bio updated: "Adelaide beekeeping training" + BSSA
- ✓ Linktree — 5 destinations: courses, shop, support, LAB, contact
- ✓ Target: 200+ followers within 90 days

Facebook

- ✓ Category fixed to "Agricultural Service"
- ✓ About section complete with keywords and credentials
- ✓ CTA button active — "Book a Course"
- ✓ Original expert content — builds AH authority, not others'
- ✓ Facebook Events created for every course date

LinkedIn

- ✓ Learn About Bees business page created
- ✓ Professional headline with BSSA + Varroa Program credentials
- ✓ Weekly thought leadership posts — varroa and education topics
- ✓ Target: 150 connections and B2B enquiries within 90 days

Post Templates

How to use these templates: Each template below shows you the layout, placeholder text, and image area. Open Canva, create a new post sized 1080×1080px for Instagram or 1200×630px for Facebook, and recreate the layout. Every template is reusable; just swap the text and image each time.

6 reusable Canva templates: one per content type.

The content types are:

Product Highlight

Bee Fact

Course Promotion

Testimonial

Seasonal Tip

Event Announcement

Post Templates - Product Highlight

How to Recreate in Canva

- 1 Open Canva → New design → Instagram Post (1080×1080)**
Choose a warm cream or honey-gold background colour
- 2 Upload your honey product photo**
Fill the top 60% of the canvas. Natural lighting is essential — no heavy filters
- 3 Add a large title text box**
Font: DM Serif Display or similar serif. Size: 28–32pt. Colour: dark brown #1A1208

- 4 Add 2 lines of body text below**
Font: DM Sans or similar sans-serif. Size: 14–16pt. Colour: #3D2E10
- 5 Add a small price/CTA line at the bottom**
Honey gold background strip. White or dark text. "Link in bio" always included
- 6 Download as PNG → post to Instagram**
Copy this template and just swap photo + text each time. Reusable forever.

Caption to use with this template:

"Raw. Unfiltered. Straight from our Adelaide hives. 🐝 Never heated, never blended — just pure South Australian honey. Available in 500g (\$15) and 3kg (\$90). Order via link in bio."

Instagram Facebook

Hashtags: #RawHoney #AdelaideHoney #LocalHoney
#SouthAustralia #NaturalFood #AphroditesHarvest

Post Templates - Bee Fact

How to Recreate in Canva - 5 Slide Carousel

1 Open Canva → New design → Instagram Post (1080×1080)
Choose a soft green background — #E8F5EE works perfectly

2 Centre a large bee icon or illustration
Canva has free bee graphics in the Elements library — search "bee illustration"

3 Add "Fact X of 5" in small text at top
Keeps audience swiping through all 5 slides

4 Add the bee fact in large centred text
One fact per slide. Keep it under 15 words. Make it surprising or counterintuitive.

5 Slide 5 is always the CTA slide
"Want to learn more? Our beginner beekeeping courses are made for you — link in bio"

6 Duplicate the design 4 times → change the fact on each
Download all 5 as PNG and post as carousel on Instagram

5 bee facts to use:

1. A honeybee visits 1,500 flowers for one teaspoon of honey
2. Worker bees live only 6 weeks in summer
3. A hive can contain up to 80,000 bees
4. Bees communicate through the waggle dance
5. Honey never expires — 3,000-year-old honey has been found edible

Post Templates - Course Promotion

How to Recreate in Canva

- 1 Use a blue or teal background — course content feels more professional in cooler tones
Suggested: #EAF2FB (light blue)

- 2 Add a real photo from a previous course at the top
Students in bee suits are the most effective visual — shows the real experience

- 3 Add course name as large headline
This is the most important text — make it the biggest element

- 4 Add location, price, and date as three icon-text rows
Adelaide · \$159 · [Date]. Update the date each time — everything else stays the same.

- 5 Add your BSSA credentials in smaller text
"Led by Aphrodite Noikou — BSSA Accredited Beekeeper and National Varroa Management Program Trainer"

- 6 Green CTA bar at the bottom — "Book now — spots are limited"
Urgency works. "Spots are limited" is honest and drives action.

Use on: Facebook (post + create a Facebook Event), Instagram (story + feed post), LinkedIn (professional framing version)

Post Templates - Testimonial

How to Recreate in Canva

- 1 **Warm cream background — same as product template for brand consistency**
Testimonials should feel warm and trustworthy, not clinical

- 2 **5 gold stars centred at the top**
Use Canva's star shapes or the ★ emoji — large and prominent

- 3 **Review text in large italic serif font — centred**
Use quotation marks. Keep the review under 30 words — shorter is more powerful

- 4 **Attribution in smaller text below**
"— Course participant, Google review" — do not use first names unless you have written permission

- 5 **Honey-coloured CTA button at the bottom**
"Book your course — link in bio" or "Shop our honey — link in bio" depending on the review

- 6 **Make 5 slides — one review per slide**
Post as a carousel once per month. You have enough Google reviews to rotate these indefinitely.

Post Templates - Seasonal Tip

How to Recreate in Canva

- 1 Create once per season — 4 times per year**
Summer, Autumn, Winter, Spring. Each gets its own checklist post. Highly shareable in SA beekeeping groups.
- 2 Season icon in the title**
❄️ Winter · 🌸 Spring · ☀️ Summer · 🍁 Autumn — changes the visual without redesigning anything
- 3 5 practical checklist items with tick marks**
Must be genuinely useful — not generic. Written in Aphrodite's voice, not copied from another source.
- 4 Sign-off with credentials and comment invitation**
"Any questions? Drop them below 🙋" drives comments which boost the post algorithmically on Facebook.
- 5 Post primarily on Facebook — share to Instagram stories**
Facebook community loves practical expert advice. Instagram works better for visual content than text lists.

Post Templates - Event Announcemet

How to use and the Facebook Event Trick

1 Green "new date available" banner at the very top

Makes it immediately clear this is a time-sensitive announcement, not general content

2 Course photo in the middle third

Real course photos outperform stock images every time — use your own

3 Course name as large headline

The template is already designed — just change the course name and date each time

4 Three detail lines: location, date, price

Keep it scannable. People decide in 3 seconds whether to read further.

5 The Facebook Event trick — always create a Facebook Event too

Go to your Facebook page → Events → Create Event. This appears in local event discovery separately from your post — doubling your reach for free.

6 Post on Facebook, Instagram, and LinkedIn

Rewrite the caption for each platform. Facebook is detailed, Instagram is visual and brief, LinkedIn is professional and B2B.

Example Content Pack

Ready-to-use posts: There are 7 example posts ready for you to publish. Each one has a full caption, hashtags, and a call to action. Copy the caption, add your own photo, and post. You do not need to write anything from scratch — just personalise where indicated.

#	Platform	Post type	Pillar	Best time
1	Instagram	Reel — introduction	Product & Brand	6-8pm
2	Instagram	Photo — raw honey	Product & Brand	12-2pm
3	Instagram	Carousel — bee facts	Education	6-8pm
4	Facebook	Original post — varroa	Support & Expertise	1-3pm
5	Facebook	Course announcement	Education	9-11am
6	LinkedIn	Thought leadership	Support & Expertise	8-10am
7	LinkedIn	Business page launch	Education	Launch day

30 years, one passion. 🐝 I didn't choose beekeeping — it chose me. As a second-generation beekeeper, I grew up watching my father tend his hives. Now I dedicate myself fully to what I love most. I'm Aphrodite — BSSA accredited beekeeper, National Varroa Program trainer, and founder of Learn About Bees. Whether you want pure Adelaide honey, to learn beekeeping, or to protect your hives — I'm here. Link in bio.

After 30 years of beekeeping, I've seen how quickly an ecosystem can be disrupted. Varroa is now in South Australia — and this requires every beekeeper to act. The challenge is not just biological. It's educational. Through Learn About Bees and my role as a National Varroa Program trainer, I'm committed to ensuring SA beekeepers have the skills they need. If you're connected to agriculture, education, or sustainability in SA — I'd love to connect.

Monthly Checklist

How to use this checklist: Print this page or save it on your phone. Tick off each task as you complete it. You do not need to do everything every week: consistency at a lower level beats occasional bursts followed by silence.

Weekly — every Monday (10 mins)

Aphrodite · 10 mins

- ☐ Check Instagram Insights — note reach and saves on last week's posts
- ☐ Check Facebook — respond to all comments and messages
- ☐ Check LinkedIn — accept connections, respond to DMs
- ☐ Confirm this week's posts are scheduled and ready in Meta Business Suite
- ☐ Note any upcoming course dates that need promoting this week

Monthly — first Monday (45 mins)

Aphrodite · 45 mins

- ☐ Record Instagram: follower count, total reach, top 3 posts by saves
- ☐ Record Facebook: follower count, course enquiry DMs received this month
- ☐ Record LinkedIn: profile views, new connections, post impressions
- ☐ Note which content pillar performed best this month
- ☐ Plan next month's content calendar — at least 12 posts sketched
- ☐ Update Google Business Profile with a new monthly post
- ☐ Pin the monthly wrap-up post to the top of Facebook

Fortnightly — content batch session

Aphrodite · 90 mins

- ☐ Film 2–3 short reels during a hive visit (phone camera is fine)
- ☐ Write captions for the next 2 weeks of posts in one sitting
- ☐ Open Canva and create any graphics needed for the next 2 weeks
- ☐ Schedule everything in Meta Business Suite for Instagram and Facebook
- ☐ Schedule LinkedIn posts using LinkedIn's native scheduler

Quarterly — every 3 months (90 mins)

Aphrodite · 90 mins

- ☐ Compare all metrics against 90-day KPI targets in the strategy document
- ☐ Identify top 3 best-performing posts — what do they have in common?
- ☐ Identify 3 lowest-performing post types — reduce or stop these
- ☐ Did social media generate direct course enquiries this quarter?
- ☐ Update hashtag strategy based on which tags drove the most reach
- ☐ Adjust next quarter's calendar for season and upcoming course schedule

Monthly Checklist

What to do when things go wrong — quick response guide

If this happens	It likely means	What to do
Follower growth stalls for 2+ weeks	Content only reaching existing followers — not new audiences	Post a Reel on Instagram or share a post to an SA beekeeping community group on Facebook
Followers growing but no course enquiries	Call to action is unclear or missing from posts	Add "Book via link in bio" or "DM me for details" to every course-related post
A negative comment appears publicly	Normal for any public account — the response matters more than the comment	Respond within 24 hours. Acknowledge, thank, offer to resolve via DM. Never delete. Never argue.
Posting becomes inconsistent	Content creation feels too effortful or unpredictable	Return to the fortnightly batch system. Reduce to 2 posts per week — consistency beats volume.

Analytics Guide

Key principle: Review these metrics monthly, not daily. Checking every day causes unnecessary stress and the numbers will fluctuate naturally. What matters is the monthly trend — are things moving in the right direction over time?

Instagram

Brand visibility and education reach

Reach

How many unique accounts saw your post — including people who don't follow you yet. This is your growth engine.

Target: Each reel reaching 3× your follower count

Saves

How many people saved your post to come back to later. Saves are the strongest signal that your content has real value.

Target: 10+ saves per educational carousel post

Follower growth

Net new followers per month. Growth should be gradual and consistent — sudden spikes often drop off quickly.

Target: +50 per month in months 1–3

Link in bio clicks

How many people clicked your Linktree link. This is the most direct revenue signal available on Instagram.

Target: 20+ clicks per month

Facebook

Community and course promotion

Reach per post

How many people saw each post. Original expert content (written by Aphrodite) consistently outperforms shared content from other pages.

Target: 2× your follower count per original post

Shares

When someone shares your post, their entire network sees it — for free. Seasonal checklists and varroa tips get shared most often.

Target: 1+ share per educational post

Course enquiry messages

Direct messages asking about courses. Track these manually in your Facebook inbox — this is your most important Facebook metric.

Target: 3–5 DMs per course announcement

Page follower growth

Net new page followers per month. Fix the category and post consistently — growth will follow.

Target: 85 → 200 followers in 90 days

LinkedIn

Authority and Learn About Bees

Post impressions

How many times your post appeared in someone's feed. LinkedIn rewards niche expert content — the more specific, the better it performs.

Target: 300+ impressions per thought leadership post

Connection growth

New professional connections per month. Actively connect with SA agriculture, education, and sustainability professionals.

Target: 1 → 150 connections in 90 days

LAB page followers

Followers on the Learn About Bees business page. This page needs to be created first before tracking can begin.

Target: 75 followers within 60 days of page creation

Inbound enquiries

Professional DMs about courses, partnerships, or B2B opportunities. Even 1–2 per month represents significant B2B potential for LAB.

Target: 1–2 professional DMs per month by month 3

Analytics Guide

How often to check — and what to do with the numbers

Check comments and DMs	Daily — respond within 24 hours	5 mins
Glance at Instagram Insights top post	Weekly — every Friday	3 mins
Record all platform metrics in a spreadsheet	Monthly — first Monday	20 mins
Compare monthly metrics to targets	Monthly — same session	10 mins
Adjust strategy based on what is working	Quarterly — every 3 months	30 mins
Full KPI review against 90-day targets	Once at 90-day mark	60 mins

TASK	TOOL	COST	WHY THIS TOOL
Check Instagram and Facebook metrics	Instagram Insights / Facebook Insights	Free — built in	Native platform data — most accurate available. Access via your phone app.
Schedule Instagram and Facebook posts	Meta Business Suite	Free	Official Meta tool. Schedule both platforms simultaneously. No third-party access needed.
Schedule LinkedIn posts	LinkedIn native scheduler	Free — built in	Built directly into LinkedIn. Reliable and simple. No external tool needed.
Create graphics and post designs	Canva	Free (Pro optional)	Drag-and-drop templates. Pre-sized for every platform. No design experience needed.
Link in bio — routes to all services	Linktree	Free	One link → courses, shop, support, LAB. Tracks clicks per destination. Takes 15 mins to set up.
Edit reels and add captions	CapCut (mobile app)	Free	Auto-generates captions on video. Simple trim and text tools. Designed for social media reels.
Local search visibility	Google Business Profile	Free	Controls how AH appears in Google Maps. 5.0 rating already there — maintain it with monthly posts.
Track website traffic from social	Google Analytics	Free	Shows how many website visitors came from each social platform. Connects social effort to real outcomes.
